

Zapier AI Code for DealerShip Info

```
workflow.zapierSuccess = false

const leadData = {
  name: workflow.name,
  email: workflow.email,
  phone: workflow.phone,
  apiResponse: workflow.apiResponse,
  apiResponse2: workflow.apiResponse2,
  carwant1: workflow.carwant1,
  carwant2: workflow.carwant2,
}

// Replace YOUR_ZAPIER_URL_HERE with your zapier webhook url
try {
  const response = await
  axios.post('https://hooks.zapier.com/hooks/catch/16012724/31o51eh/', leadData)
  console.log(response.data)
  workflow.zapierSuccess = true
} catch (error) {
  console.error(error)
}
```

Zapier AI Code for Booking

```
workflow.zapierSuccess = false

const leadData = {
  name: workflow.name,
  email: workflow.email,
  phone: workflow.phone,
  apiResponse: workflow.apiResponse,
  apiResponse2: workflow.apiResponse2,
  carwant1: workflow.carwant1,
  carwant2: workflow.carwant2,
  date: workflow.date,
}
```

```
// Replace YOUR_ZAPIER_URL_HERE with your zapier webhook url
try {
  const response = await
  axios.post('https://hooks.zapier.com/hooks/catch/16012724/31o51eh/', leadData)
  console.log(response.data)
  workflow.zapierSuccess = true
} catch (error) {
  console.error(error)
}
```
